

NEW GENERAL WASTE DISCHARGE REQUIREMENTS FOR WINERIES

Winery Process Water Discharge

TIER 1 10,000 – 100,000 gallons per year

TIER 2 100,001 – 300,000 gallons per year

TIER 3 300,001 – 1,000,000 gallons per year

TIER 4 >1,000,000 gallons per year

If your winery discharges more than 10,000 gallons of process water annually, new permit requirements may apply.

Condor's CA Licensed Professional Engineers, Hydrogeologists and Geologists provide Waste Discharge Requirements (WDR) assistance to the agricultural industry and publicly and privately owned wastewater treatment works. With nearly four decades of experience, Condor can guide you through the nuances of the individual Tier requirements and proactively prepare your winery for General Order compliance. Our expertise includes data acquisition and analyses for hydrogeologic investigations involving groundwater quality and degradation, monitoring well siting and development, and preparation of reports for regulatory submittal. Condor's professional capabilities include the following WDR services:

- *Hydrogeologic Investigations*
- *WDRs and Monitoring Reporting Programs (MRPs)*
- *Groundwater Quality/Degradation Analysis*
- *Contaminant Investigation, Remediation, Monitoring and Reporting*
- *Groundwater Monitoring Well Installations and Development*
- *Groundwater Flow Modeling*
