

SGMA Compliance Services

“We Lay the Groundwork for Success”

Overview

The Sustainable Groundwater Management Act (SGMA) requires diligent planning and analysis of groundwater use. Groundwater users and other stakeholders in basin planning areas will need competent hydrogeological expertise during the Groundwater Sustainability Planning (GSP) period to support their interests. Condor’s experienced groundwater professionals routinely perform assessment, remedial and compliance-related services for both public and private sector clients. Our core values of technical excellence, creativity, and commitment drive our performance. For nearly 35 years, we have developed lasting and valuable partnerships with our clients and vendors over the course of thousands of projects. Condor is committed to assisting our clients in an efficient and cost effective manner. We look forward to an opportunity to be your trusted advisor on groundwater matters.

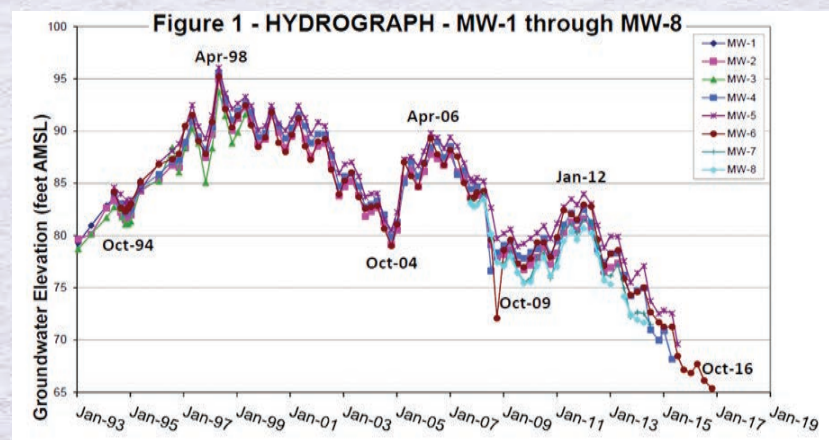

SGMA Services:

- Conceptual Groundwater Models for Management Area Definition
- Geologic Analysis—Stratigraphy, Aquifer Characterization, Computer Flow Modeling
- Groundwater Sustainability Plan (GSP) Development, Input, Review and Critique
- Groundwater Level Trends and Water Quality Assessment and Monitoring
- Groundwater Replenishment Project Evaluation
- Storage and Recovery
- First Notice of Groundwater extraction to establish prior use
- Filing Initial Disclosure Information in Adjudication Procedures
- Litigation Support
- Reporting Annual Extraction

John H. Kramer, PhD
Principal Hydrogeologist
jkramer@condorearth.com

Dr. Kramer is a California Certified Hydrologist and Certified Engineering Geologist. He has been with Condor 23 years and has over 30 years of experience in geological science and geochemistry.
