

GIS Conversion Services

"We Lay the Groundwork for Success"

Overview

Condor's highly qualified team of Geographical Information Systems (GIS) professionals can provide a scalable service for converting CAD or engineering plans into useable GIS data for import into an Asset Management System. These services can include converting the requested data from AutoCAD, hardcopy, or PDF files to GIS spatial layers and adding any associated and requested attribute information. Condor can produce spatial file types compatible with most GIS programs; ESRI Shapefile or Geodatabase, complete with any requested domains, subtypes, and attribute rules. We can also produce other common spatial data types upon request (KML, KMZ, etc.).

Scalable Service:

- Condor can provide scalable services for converting plans into usable GIS data for import into an Asset Management System.
- We can provide these services on a time-and-materials basis for services over time, or as a one-time, fixed-fee conversion to promote quality and completeness.

How:

- Condor can convert plans into GIS vector spatial data using client provided spatial data templates complete with lists, default values, and rules or;
- Condor can create the spatial data templates from scratch to client specifications allowing for a cohesive import into Asset Management Systems.

The End Result:

- Condor will produce actionable data files in any common spatial data file format that will integrate into existing files or serve as the basis for an Asset Management System complete to client specifications.
- Condor will provide a Quality Assurance and Quality Control dataset for review by the client.
- We will work with your team(s) to import the data in a way that maintains your data's security and confidentiality.

Conversion:

These services include converting data from AutoCAD design drawings or as-built drawings into GIS spatial files.
